FIDELITY AWARD 2024:
Ailsa Ultra L RCA with Grun

Atlas Cables Ailsa Ultra L RCA with Grun

The basic ingredients are solid already: Ailsa is the goldilocks series in the Atlas Cables range and offers all the essential high-end ingredients, such as OCC copper conductors and Microporous PTFE as a dielectric, at a price that is still just about attainable. The highlight, however, is the elegant Grun earthing system, which disperses unwanted RFI and EMI noise before they can reach the components.

Piggyback: The Grun earthing conductors are attached to the cables; diverting the unwanted noise to a known earthing point such as to a special pin on the Atlas Eos power distributor or Grun power adaptor.
